1. Claims 12 and 22-30 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Figs. 10A and 10B disclose the source region is isolated from the insulation film. However, figs. 10A and 10B never discloses the impurity concentration of the channel region is equal to or less than an impurity concentration in the drift region, and a depletion layer forms over the entire channel region sandwiched between the gate region when a zero bias is applied to the gate region as claimed in claim 12. The specification never discloses the embodiment of figs. 10A and 10B can be combined with the embodiment of figs. 9A and 9B.

The specification never discloses the claimed structure of each of claims 22-29 in *the* claimed structure of claim 12.

The specification never discloses the device structure of claim 30.

2. Claims 28 and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 28, line 4, "a distance of the gate region" is unclear whether it is being referred to a distance between two portions of the gate region.

In claim 29, line 4, "a space of the gate region" is unclear whether it is being referred to a distance between two portions of the gate region.

3. Claims 1, 4, 20 and 21 are allowed.
